cleaning machine**

Developed and manufactured by

MORTCO / CORPORATION

2505 S.E. 11th, Portland, Ore. 97202

Patented U.S. and abroad

now you can sweep out the obsolete

YOUR BANDS ARE UNIFORMLY CLEANED.

Old hand cleaning methods are inconsistent. The GOSSEN delivers a uniform, top quality job every time . . . because it is automatic and geared for precision requirements.

EXTEND THE LIFE OF YOUR MATS.

The GOSSEN buffs and polishes the bands in exactly the right places. This means the band's casting area gets special attention . . . comes out sharp to help keep mats running hair-line free longer.

OPERATION IS FASTER, CLEANER, SIMPLER.

Just flip the starting switches. In less than 2 minutes you're ready to return a set of precision cleaned bands to the linecasting machine. No more graphite in the air, in the hair—everywhere.

COMPOSING ROOM TESTED.

The GOSSEN was developed by men who work every day with linecasting machines . . . men who best know composing room needs. The GOSSEN has undergone rigorous, on-the-job tests to assure top performance and dependability.

ONE YEAR GUARANTEE on all workmanship and parts. Polishing wheels, of course, are subject to normal wear.

COMPACT SIZE. 42" long, 12" wide and 12" high. Just right for the top of a work bench.

RUBBERIZED TOP SURFACE. Provides protected space for additional sets while one set is being cleaned.

SIMPLE MAINTENANCE. Requires only normal oiling and occasional replacement of the rubber polishing wheels. A box of 16 polishing wheels accompanies each unit.

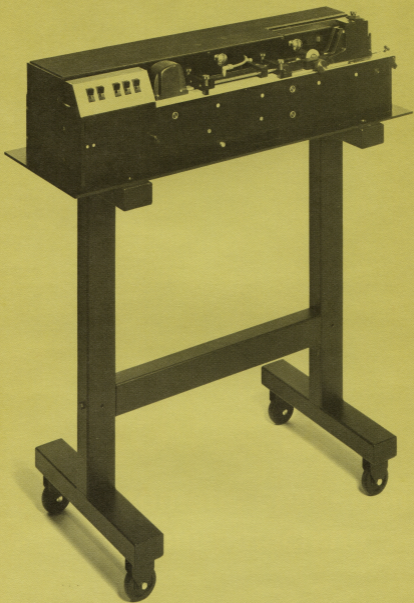

EASY TO INSTALL. Simply plug into the wall. Operates on 110-115 volts.

ADAPTS TO ANY VOLTAGE REQUIREMENT. Where varying voltages are required, special motors may be ordered at nominal cost.

OVERSEAS SHIPMENTS. Machines are crated and delivered F.A.S. dock, Portland, Oregon.

MOVABLE UNIT enables you to move the unit from one location to another.
