Outstanding FEATURES

C&G TRIMSTEEL SAW BLADE cuts slugs so smoothly trimmers are not required on average work. Also cuts typehigh stereotypes and wood.

72 PICA GAUGE with finger tip control for adjustment to points. Accurate to .001 inch.

WORKHOLDER is improved toggle type, permits short measure sawing, clamping capacity 6 inches. Instantly removable for sawing large plates.

WIDE SAW GUARD gives utmost safety and guides chips into enclosed waste drawer.

HINGED SUB-TABLE provides support when sawing plates, long slugs and rule.

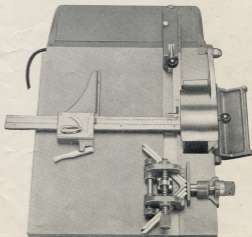

FABRICATED STEEL HOUSING provides complete enclosure of motor, pulley and mandrel, yet easily accessible with removable back plate and hinged table.

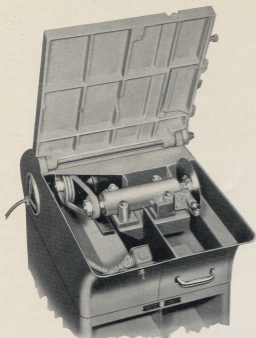

BALL BEARING MANDREL with spindle lock for removing saw blade. Driven with V-Belt.

MITER VISE makes all miters face up.

MITER GAUGE has micrometer adjustment to points.

PARTITIONED CABINET provides storage for strip material, double column galleys, base material and cuts.

The Sawliner was designed primarily for the smaller plants. A saw they could install with a small investment without shopping for something cheap.

It was soon found that the demand for a low cost saw was not confined to the small printing plants and newspapers. Larger offices welcomed it as an auxiliary machine to supplement their heavy duty saw trimmers.

Commercial plants will want the Sawliner for special sawing jobs that interfere with production on the regular composing room saw.

Newspapers will find it ideal for ad alley use. The Sawliner will be furnished with wheels as pictured at slight additional cost.

For use in engraving rooms the Sawliner can be equipped with a special blade for sawing zinc, copper and other materials.

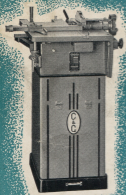

Let Us Solve Your Particular Problem

After 20 years of manufacturing C&G Saw Trimmers the Milwaukee Saw Trimmer Corporation invades the low priced field with this most modern of all composing room saws.

The C&G SAWLINER is not only a beautiful machine with its up-to-the-minute design and spacious cabinet, it does a better job of sawing slugs, plate matter and mitering than any other saw in its price range.

The Milwaukee Saw Trimmer Corporation has guarded its reputation of careful manufacture in building the SAWLINER and is proud to announce this companion to the C&G Model 3-A and Model 2 Saw Trimmers.

THE success of the well balanced C&G line pictured here made possible the development of the Sawliner. It will take its rightful position in the C&G parade.

- The Model 3-A out performs all others. A heavy duty saw trimmer as yet unequaled. Write for details of its exclusive features and the application of the C&G Angle Gauge.
- For many years the No. 2 C&G Saw Trimmer has brought efficiency and profit to thousands of composing rooms. Acclaimed to be the fastest slug and rule saw ever manufactured.
- Some of the finest plants in the Country using the Router, Jigsaw and Type High Machine. Write for list of users in your vicinity.
- The Router and Type High Machine is designed for plants not requiring the use of a jigsaw. An economical machine to use.
- A C&G Strip Material Cabinet is something every saw trimmer owner can use to advantage. Holds over 1200 pounds of metal.
- Waste Receptacles useful in any composing room. No. 20 housed in the base of Model 3-A Saw Trimmer as standard equipment.

Each is the leader in its field and all are sold on a performance guarantee. Write us for descriptive literature of each machine.
