Creighton Standing-Galley Shelving.

THIS new shelving represents a most economical idea for a crowded office. It makes waste space available. The shelves when fastened to a wall or partition project only 6¼ inches. Built any length desired and sold by the running foot. The shelving can be fastened to wood partitions or to brick walls. Only brackets and shelving are required for wood partitions. For brick partitions hardwood uprights should be used, on which the brackets are fastened, and the uprights can be screwed to the brick walls, the screws being fastened into wood plugs set into the brick. Any vacant wall space can be used and converted into valuable storage space for standing ads., jobs under way, electrotypes or book pages. Pages 9 inches long can be accommodated, with heading to the front, and every line will be easily accessible for correction. The galley shelves are furnished either of hardwood or soft wood. The soft-wood shelving is for drying Simplex type and can be divided, when required, into column widths.

In a wall space 6 feet long by 5½ feet high from fifty to sixty pages 7 by 9 can be stored, taking up only 6 inches of space from the wall, and every line of type will be in plain sight, and in a position for alteration. The brackets are of cast iron, enameled, drilled for screws and ready for adjustment. The hardwood uprights are drilled for screws to fasten to the wall and also for brackets properly spaced. It is an easy matter to put the shelving in place. In ordering brackets for long lengths, about one bracket should be figured for each three feet of shelving, taking into consideration the end brackets. Thus, three brackets would be required for a 6-foot length. When in place, each shelf takes up a perpendicular space of 9 inches. A series of seven shelves will therefore occupy 63 inches, with an addition of about 2 inches at each end of uprights.

PRICE-LIST.

Brackets per pair, including screws, - - - - -	75c.
Hardwood shelving, any length, per running foot, - - - - -	35c.
