

# An Interesting, Unique and Novel Article of Office Equipment ::::

## The "Folliometer"

This is the name of a perfect word and folio counter for use with typewriters. It is neat in appearance, efficient, durable, accurate and reliable. It can be instantly and easily attached to or detached from *any* typewriter by *anybody* without in *any way* interfering with the operator or the machine. Its greatest charm is its simplicity. Its merits have already ensured its success.

### Special Notice to Makers of Typewriting Machines and Users of the Various Duplicating Machines

¶ The day has come for you to have a serious, hard-working **Duplicating Machine** for fac-simile work as an **auxiliary to your typewriter** — not a plaything.

¶ The only way to insure this is to have metal type cast, for use in the Duplicator, similar to the face on your Typewriter.

¶ We have laid ourselves out to do this special kind of work and are already supplying the leading firms in the trade.

¶ We have now ready for sale, the Remington and Smith-Premier faces in three sizes.

¶ Prices on application.

¶ We also wish to draw your attention to the *Patents and Design Act, 1907, now in operation in England.*

¶ We have been established as Type Founders since 1864 and can assure you of every satisfaction.

**E. & F. GYLES, Anglo-American Type Foundry**  
4-5, Crawford Passage, Farringdon Rd., London, E. C.
